

# Quarterly investor update, Q3 2015

## Highlights Q3

- / Opened 3 new stations to bring the total up to 39 operational stations
- / Customer growth +32% over previous quarter
- / Volume growth (kWh) +45% over previous quarter
- / Revenue growth +39% over previous quarter
- / Uptime stations remains consistent over 99,99%
- / Fastned partnered with Nissan to offer 2 years of free charging with every Leaf
- / The Fastned Founders Club grew steadily to over 40 members

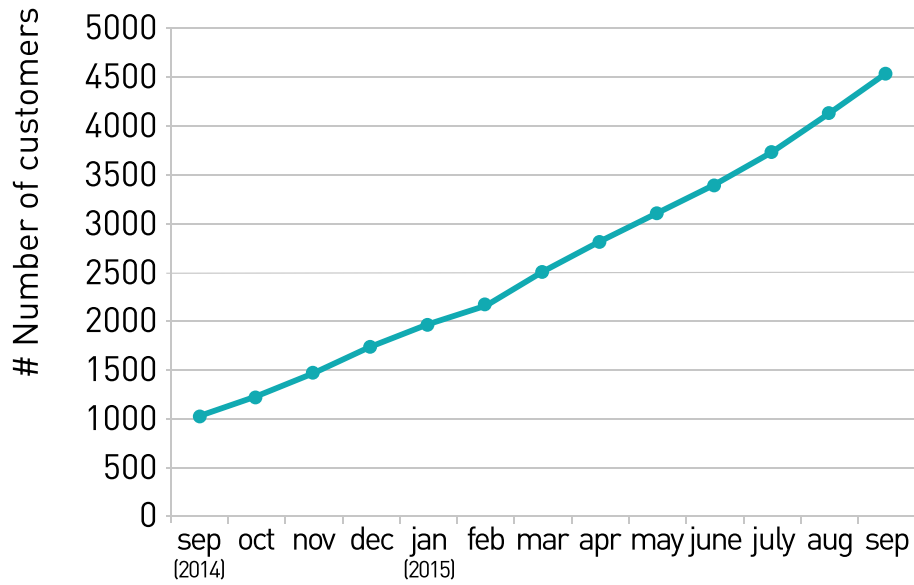

In the third quarter we opened 3 new stations. This was less than one new station per week due to the summer building stop. In september we started construction of the next batch of 12 stations, which will be completed in Q4 2015. This will bring the total number of operational Fastned stations up to 50 stations. The uptime of the stations is consistent at 99,99%. Customer growth was 32% over the previous quarter. Volume growth is higher at 45% as a result of increasing volume per customer. Revenues increased with 39% compared to Q2.

We also announced a first partnership with a major OEM in Q3. Every new Nissan Leaf now comes with 2 years of unlimited charging at all Fastned stations in The Netherlands and abroad.

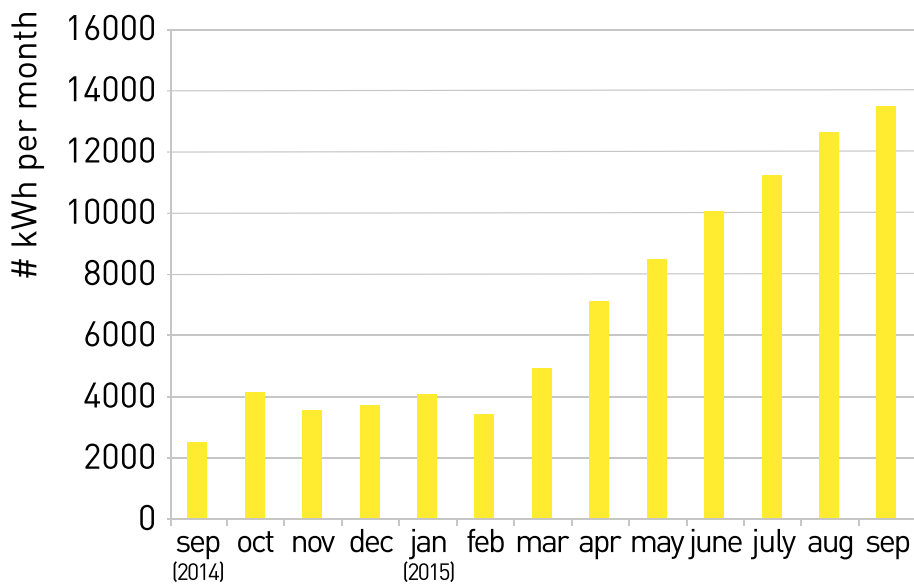

At the same time we continued our efforts towards a pan-European fast charging network for all car brands. Read about this exciting next step in our latest blog: [fastned.nl/freedomplan](http://fastned.nl/freedomplan)

# Key data Q3

## Customer growth (cumulative)

## Volume growth (kWh)

## Revenue
